ABOUT ME AND MY WORK

Typical projects, tasks or challenges you partner with nonprofits on?

My projects often begin as technology selection / evaluation / implementation and evolve to address business processes, governance, and strategy.

Organizations often treat technology as the solution, rather than defining their objectives and choosing technologies that are effective tools for implementing solutions. As a result, questions about technology often naturally lead to questions about governance and strategy.

Why would someone choose to work with you?

I left a small nonprofit to acquire additional skills with which to help nonprofits. In 25 years, I have worked with everything from start-ups to global giants like Amazon and IBM, gained diverse experience to share, and I'm eager to put it to use for the public good.

Since returning to nonprofit work, I've served as the executive director of the Hudson River Sloop Clearwater, and the director of operations for Get Us PPE, which distributed 13 million pairs of gloves, masks and other personal protective equipment in 2020 and 2021.

I love understanding what people care about, and how they work, whether they work with high finance, software code, or their hands. I enjoy empowering teams by helping them find dignity in every job. I will roll up my sleeves and get dirt under my fingernails with you.
